5.7, Fireworks MX, Dreamweaver MX,
FrontPage 2000-2003, Microsoft Office

Other Skills

Teaching, advertising, administrative,
reprographic, book keeping, stock taking, data
collection and problem solving

Employment Summary

2005 Sep - Present

Quirky By Design (previously iPyramidia Holistic Web Design up until 2014), Self-employed.

Web Designer, Graphics Designer, Photographer, Hosting Reseller, Other Web Services and Web related resources.

As a self-employed web designer, I have successfully developed a full working knowledge (under self-tuition) since 1999, building a client base over the past 11 years within a Holistic niche, which in 2014 expanded on to include all areas.

My working experience includes HTML, PHP, JavaScript, DHTML, CSS, Flash as well as implementing SEO practices to raise web site positions within Search Engines as well as use social media such as Facebook, Twitter, Pinterest and LinkedIn for more visibility.

I have used a varied selection of software and programs in this time; I mainly now modify, custom and implement WordPress, Joomla templates and their components, which is more user friendly and accommodates clients needs. Previously, other lesser-known CMS and PHP scripts.

During this time I also ran my own Holistic Networking site www.spiritmindbody.co.uk (example only now), in which I had over 1000 members, developed online advertising for clients some of which included companies such as Hay House Publishers and Mind Body Spirit Festivals (London).

On my main web site there is an online shop that includes my secondary passion as an Artisan.

My Web Design Portfolio can be found here:
